PROFESSIONAL SUMMARY

An ambitious Computer Science & Engineering student specializing in Full-Stack Web Development (MERN Stack) and core systems engineering. Possesses a comprehensive 4-year IT Diploma background and technical proficiency across frontend modules, backend microservices, and database management. Well-versed in Object-Oriented Programming (C++/Python) and foundational Operating Systems architectural concepts. A highly articulate communicator fluent in English, eager to deliver clean, optimized code architectures to a development team.

EDUCATION

B.Tech in Computer Science & Engineering <i>Dronacharya College of Engineering</i> Cumulative CGPA: 7.0 / 10	2024 — 2028 Gurugram, Haryana
Diploma in Information Technology (4-Year Program) <i>Haryana State Board of Technical Education (HSBTE)</i> Aggregate Percentage: 90%	Completed 2024 Haryana, India

EXPERIENCE & INDUSTRY SIMULATIONS

Software Engineering Virtual Intern <i>Nyoda</i>	May 2026 — June 2026 Remote
- Completed a comprehensive 1-month professional software engineering industry simulation workspace focusing on foundational developer workflows. - Analyzed programmatic specifications to review code quality, test data streams, and align simple functional modules with baseline project frameworks. - Gained practical exposure utilizing industry-standard environment setups, version control collaboration, and API interface verification models.	

TECHNICAL & COMMUNICATION EXPERTISE

Languages & Programming:	C++, Python, JavaScript (ES6+), SQL, R Language, HTML5, CSS3
Web Stack & Frameworks:	React.js, Node.js, Express.js, MongoDB, Responsive UI Design
Core Computer Science:	Operating Systems (OS), Relational Database Integrity, Object-Oriented Programming (OOPs)
Tools & Environments:	Git, GitHub, Postman, VS Code, MySQL Workbench
Languages Proficiency:	English (Highly Fluent / Professional), Hindi

FULL-STACK PROJECTS

SkillsSphere – Freelancer Marketplace Web Application <i>MongoDB, Express.js, React.js, Node.js, JavaScript</i>	2026
- Developed a responsive full-stack marketplace application architecture modeled to securely connect independent freelancers with active clients for professional job contracts. - Built dynamic, reusable React component workflows to handle state rendering across distinct customized dashboards for separate user types. - Designed clean Express backend controllers processing REST endpoints to handle streamlined CRUD data pipelines smoothly.	
University Transit Console & Live Bus Tracking Web System <i>React.js, Node.js, Express.js, MongoDB, Hardware Geolocation APIs</i>	2026
- Engineered an active campus transit dashboard allowing university student bodies to seamlessly trace allocated buses dynamically along specific route bounds. - Designed a secure twin-mode console running background data positioning variables via web Geolocation components to ensure smooth coordinates parsing.
